Supported devices

PCL Barcode Flash and KYOmulticode solutions are available on **Compact Flash (CF)** card and **Secure Digital (SD)** card media.

CF card solution:

Type A = For KYOCERA devices with classic application programming interface. Most pre-2007 printers and multifunction devices (FS- and KM-series, few TASKalfa models), two ECOSYS printers launched in 01/2014.

Type B/C = For KYOCERA devices with advanced application programming interface. Many post-2007 printers and multifunction devices (FS- and KM-series, most TASKalfa models).

Type A and Type B/C CF cards differ in file structure and version specific files, but can be converted into each other format (on request, KYOCERA Professional Services).

Each card available as Type A and Type B/C version.

SD card solution:

Type D = Introduced to distinguish CF card solutions from SD card solutions. All KYOCERA devices with SD card slot share the same advanced application programming interface (some FS-series printers, latest TASKalfa devices, nearly all ECOSYS devices).
