(*) Does not support local connection.

➤ For **Mac OS X 10.5** or higher, install PPD Driver version 1.1112 [04-04-2012].
Note: There are no known issues for Mac OS X.

➤ For **Linux**, install driver version 1.1203 [24-03-2012].
Note: Linux drivers for both 32-bit and 64-bit OS are located in the **\Linux** folder. Please follow the instructions in the [Installation steps.rtf] document in this folder for printer driver installation.

➤ Driver Info is located in the \Utility\ folder on the CD.

Known Issues:

All Windows Operating Systems

The CD menu may not launch properly if the Windows operating system is not updated with

the latest service packs and critical updates.

Solution: Update the Windows operating system with the latest service packs.

KYOCERA Net Viewer may not install correctly on PCs using Microsoft Windows Installer before 3.1 v2.

Solution: Update to the latest service pack and install the latest Microsoft Windows Installer.

When updating a utility using the CD Software Installer, the utility installed incorrectly. This is a known issue with the Microsoft Windows Installer.

Solution: Uninstall the previous version of the utility before installing the new one.

Status Monitor is not available from the client side in a server-client environment on Microsoft Windows Server 2003 and 2008.

Adobe® Reader® 8.0 or later is required to read the PDF documentation.

Some versions of Internet Explorer display the following warning when the Readme file is opened from the CD.

Active content can harm your computer or disclose personal information. Are you sure that you want to allow CDs to run active content on your computer?

Solution: Click Yes to open the file. The Readme file is pure html without active content, but some versions of Internet Explorer display a warning for any html document that is launched from an external drive.

Windows XP / Vista / Windows 7

Although a user has administration privileges on a machine, the user may not have admin privileges for a printer running on that machine.

Solution: Run the driver in administrator mode by choosing "Run as Administrator".

Windows Server 2008 R2 / Windows 7

"Error – Sent to Printer" error when you try to send a large print job to a Web Services for Devices-based printer in Windows Server 2008 R2 or in Windows 7.

Solution: A supported hotfix is available from Microsoft. Please refer to http://support.microsoft.com/kb/2276594/en-us?sd=rss&spid=14019 for details and instructions.
